

Thank you for helping us protect the environment for 14 years.

**In 2023, our cooperation succeeded
in meeting the legislative requirements:**

▶ **579 tonnes** of waste batteries and accumulators collected,

▶ **65,6 %** take-back rate (legislative target: 45%),

▶ **82 %** recycling rate of waste batteries and accumulators.

Together we saved 107,000 litres of water, 361 GJ of fossil fuel energy and avoided 91 tonnes of CO₂.
